

ECO INDICATOR

The Eco-Indicator from Hunter provides a visual confirmation that an irrigation system is pressurized and operating. Whether you are using Professional Landscape Dripline, point source emitters, or using subsurface products, such as the Eco-Mat® or Eco-Wrap™, the Eco-Indicator will verify the system is pressurized to at least 15 PSI.

It has a simple design and is easy to install. The bright yellow indicator stem will extend to a height of 6" when the system is running. When the system shuts off, the Eco-Indicator will retract to a protected position out of sight.

Can be installed and work with rigid PVC systems or any PE tubing or emitterline with the appropriate connections. When the pressure drops below 10 PSI, the stem retracts.

SPECIFICATIONS

- Working Pressure: 15-50 PSI
- Inlet: ½" FPT (*attach with PVC fitting or flexible swing joint*)
- Visual: 6" yellow pop up stem
- Body/Stem: UV-resistant plastic
